REMINGTON VISIBLE TYPEWRITER

It is in use by a large majority of the business houses of the world, simply because it is the BEST machine. That is why the majority of typists are Remington operators.

POINTS FOR PATRONS.

Offside—

If a player is in line with or behind the ball when it is last played he cannot possibly be offside, but if in front he is liable to be so. A player standing offside is offside till the ball is next played even though sufficient opponents fall back to make three between him and their goal line. Generally a forward in receiving a pass must have three opponents between him and the goal at the moment of the pass or he must be behind the ball or receive it from an opponent. In the latter case he is at once onside.

Free-kicks —

These are awarded for such things as tripping, jumping, hacking, holding, pushing, &c. If in the penalty area, they are called "penalty kicks." Goals may be scored direct from the place kick; whether inside or outside the penalty area, but "free-kicks" for over-carrying by the goal-keeper, a corner, dangerous play, &c. must be touched or played a second time to count as a goal.

Two halves of 45 minutes are played.

A GENTLE REMINDER.
